# WHY USER-WRITTEN SOFTWARE REALLY STACKS UP TO THE BEST

There's a lot of ATARI Computer users out there. And many of them write software. They really know what users like—and what users want. Because honestly, who knows more about users than other users?

The ATARI Program Exchange—APX—publishes user-written software for ATARI Home Computers. Which means all APX software is written by and for people just like you.

Their Home Management programs are written by people who manage their own homes.

Their Home Office programs come from people whose offices are at home!

The APX Personal Development line is written by those with a natural love for the subjects they choose.

APX games are written by game-players with one single-minded objective: FUN.

So next time you're ready to invest in some new software, see how APX programs stack up against the rest. You'll see why ATARI Home Computer users make such great software writers.

In fact, you could get so carried away that you might end up writing your own software. If you do, send it to APX!
